## JAPANESE RED MAPLES

### (ACER PALMATUM ATROPURPUREUM)

This is one of our specialties. We invite your inspection. We feel we have the finest block of Japanese Red Maples in this section. We have both grafted stock and Own Root plants. The grafted plants cost more but develop more rapidly due to the fact they are grafted on 3 year old understock. Our stock plants are of the Ashi Beni strain and in the Spring leaf out in a breath taking bright Red color. Grafted stock and Own Root plants are identical in growth and color as they both originate from the same stock plants.

---

Due to the fact that we are condensing our propagation to fewer varieties in order to secure greater production of certain plants, we are closing out all Rhododendron Hybrids, Azaleas, trees and certain varieties of shrubs at greatly reduced prices. Where you notice the word (Close Out) in the heading of any list of shrubs it means that the entire group of shrubs under that heading is being discontinued and prices are reduced accordingly. Additional discount will be allowed to any firm taking a complete group of plants.
